*Calculation of electricity:

Higher rate (winter period) – 0.07-0.20 BAM/ kwh

Lower rate (summer period) – 0.05-0.15 BAM/ kwh

Reactive power price is added to the active power price as follows:

- at higher rate period (winter period) - 0.048-0.50 BAM/ kwh
- at lower rate period (summer period) – 0.03-0.04 BAM/ kwh

Reactive power price is calculated for consumers with power measurement for 10 KV and 35 KV voltage level.

In addition, energy accounting is also payable as follows:

- BAM 4.93-1.45 (at higher rate period - winter season)
- BAM 3.70-1.45 (at lower rate period –summer season)

Energy accounting for the first tariff group amounts to BAM 13.56 (in both higher rate and lower rate periods).
